WaterHog[®] Mats

WaterHog mats feature a unique bi-level design that scrapes dirt and moisture off shoes, trapping it beneath shoe level, helping to prevent tracking. The nubs are reinforced with rubber to prevent crushing and extend the mat's performance life. WaterHog mats also feature a water dam border that can hold up to 1.5 gallons of water, keeping your floors safe and dry. The PET fabric is stain-resistant, fade-resistant, and eco-friendly, made from at least 90% recycled content reclaimed from plastic bottles.
